

AAC Chrome

Yellow Pea

Variety Description

At 104% of the check* 10% higher than Agassiz and 14% higher than CDC Golden, AAC Chrome is one of the highest yielding yellow pea varieties available. AAC Chrome has larger seeds than the check varieties with lodging resistance as good as any of the other varieties in the seed guide. The variety has resistance to powdery mildew, a strong seed coat and has a competitive protein level.

Yield Performance

*2019 Saskatchewan Seed Guide

Yield (Western Canada)	104%*
Maturity	<ul style="list-style-type: none"> • 2 days later than CDC Golden
Disease Resistance	<ul style="list-style-type: none"> • R to powdery mildew • I to fusarium wilt
Harvestability	<ul style="list-style-type: none"> • Good lodging resistance • Strong seed coat

"On our farm we continue to be impressed with AAC Chrome. The high yield, lodging resistance and powdery mildew protection check off three major boxes for us. We highly recommend these peas to anyone looking to upgrade their variety!"
