

AAC Lacombe Yellow Pea

AAC Lacombe is a semi-leafless, yellow cotyledon field pea developed at Agriculture and Agri-Food Canada Lacombe Research Centre. It is a high-yielding cultivar with excellent standability. AAC Lacombe is resistant to powdery mildew. It has medium maturity and is adapted to all field pea growing regions in western Canada. Principle breeder: Dr. Deng-Jin Bing

Strengths:

- ✓ High Yielding
- ✓ Medium to large-seeded yellow pea
- ✓ Excellent standability
- ✓ Resistant to powdery mildew
- ✓ Adapted to all pea growing regions of western Canada

Neutral Traits:

- Medium maturity
